

Skin Tightening

Fact Sheet

How does it work?

These laser treatments reverse the signs of aging and sun-damaged skin by stimulating collagen production and promoting tissue tightening.

Am I a candidate?

It's as simple as this - if your skin is showing signs of aging, then you are a candidate for this laser treatment. The staff at Rejuvenate! can help you determine your specific needs, including the number of treatments that would be recommended for your particular skin type and skin condition.

Does it hurt and are there any side effects to treatment?

At Rejuvenate! client comfort is very important to us. We have the medical expertise and best technologies available to make your treatment as pain-free as possible. Anti-aging treatment is safe and should cause only minimal discomfort. Any redness, swelling or puffiness that occurs will be transient and usually gone within a few days, if not a few hours.

How many treatments are required?

Results vary with each case. Clients may require anywhere from two to six treatments to achieve desired results. Each session will last from 15 to 30 minutes.

How long do results last?

Just like the aging process itself, this varies from person to person. However, if you take the steps to protect and preserve your freshly rejuvenated skin—such as using a medical grade SPF sunscreen, facial cleansers, and creams—the results will last longer. Many clients like to schedule follow-up maintenance treatments two to four times a year.

How do I book treatment?

Call Rejuvenate! Med Spa today at 866.594.5476 for a free consultation. We will then arrange a treatment session that seamlessly fits into your schedule.
